CSS

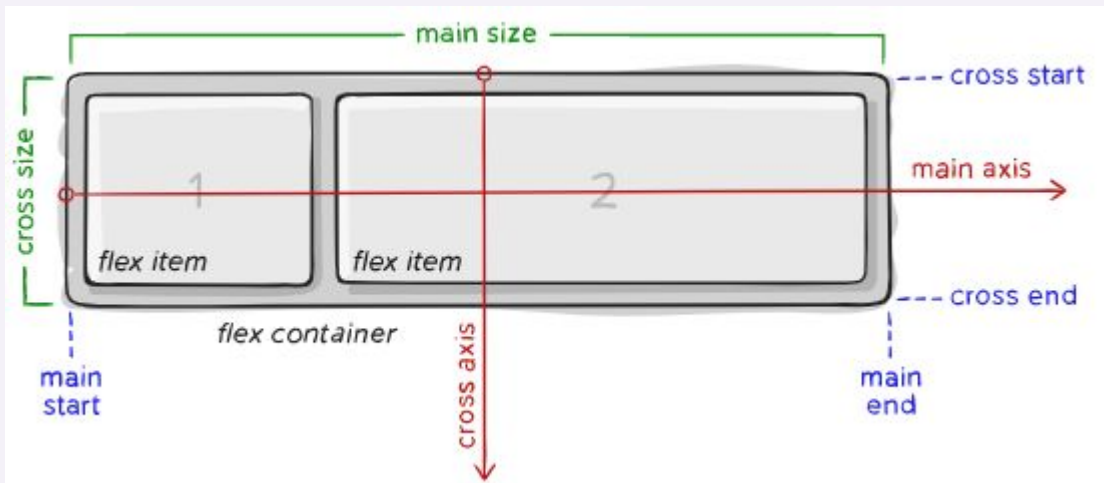

FLEXBOX

¿Qué es FLEXBOX?

Es un método que pueda ayudar a distribuir el espacio entre los ítems de una interfaz y mejorar las capacidades de alineación.

¿Qué es FLEXBOX?

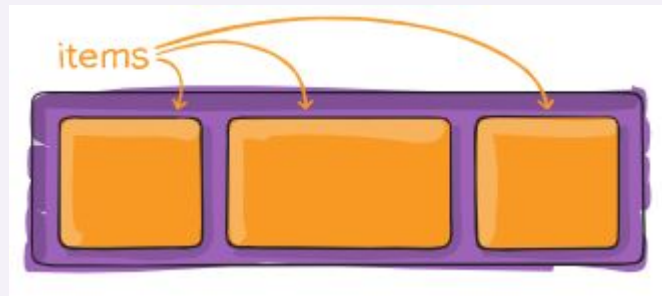

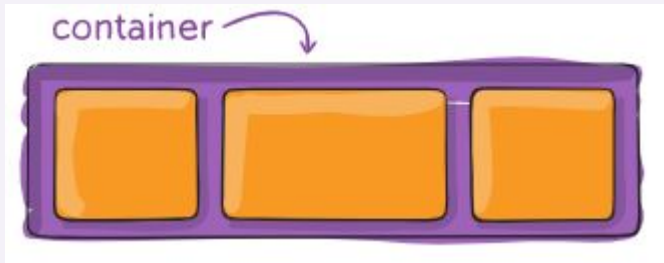

El diseño "regular" se basa en direcciones de flujo en bloque y en línea, el diseño flexible se basa en "direcciones de flujo

¿Qué es FLEXBOX?

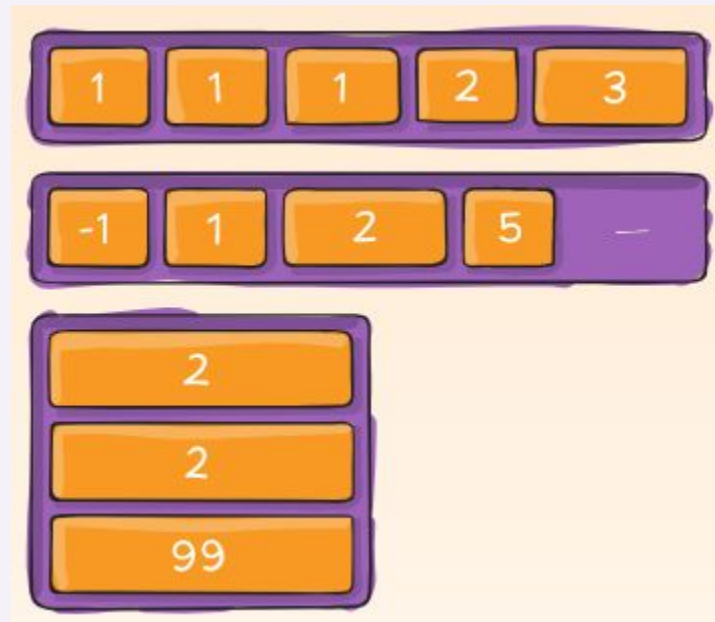

Se basa en direcciones de los objetos.

Aquí aparece por primera vez el “contenedor”

DIRECCIÓN

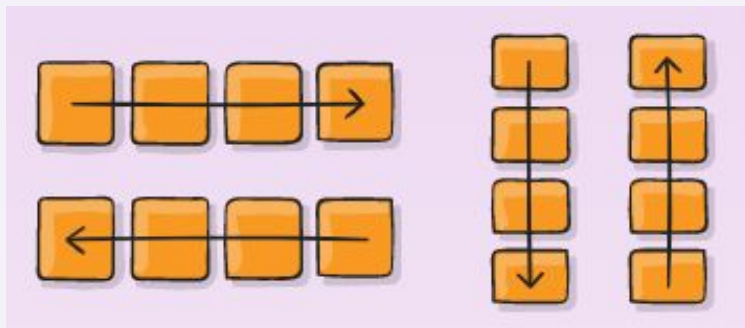

Por defecto, los elementos flexibles se presentan en el orden de origen. Sin embargo, la propiedad `order` controla el orden en que aparecen en el contenedor flexible.

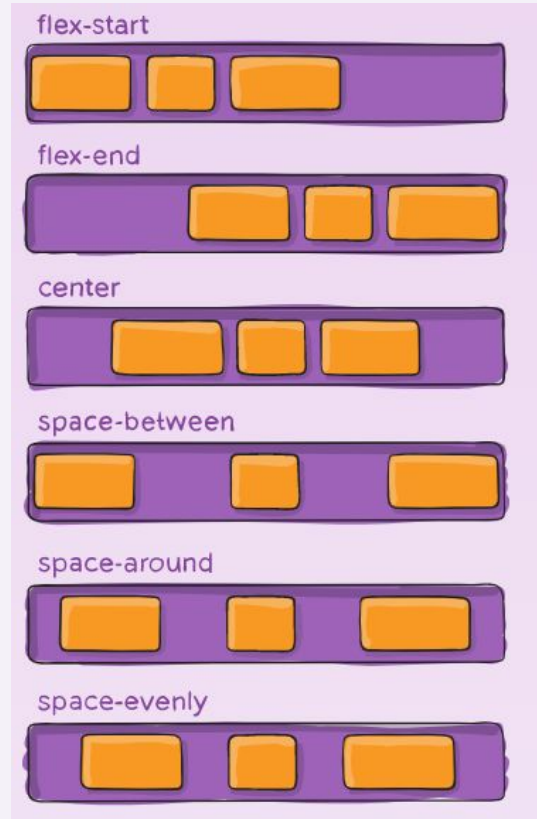

DIRECCIÓN

Esto establece el eje principal, definiendo así la dirección en la que se colocan los elementos flexibles en el contenedor flexible.

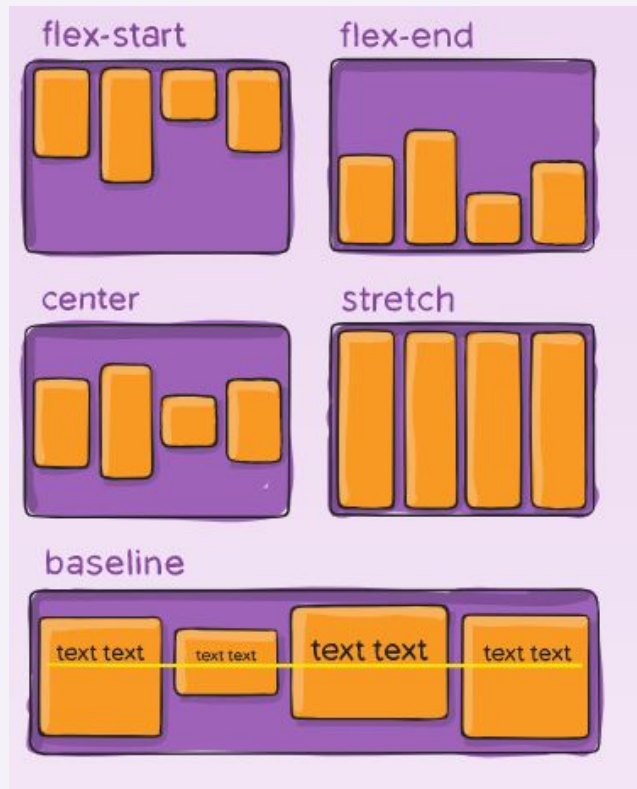

Flexbox es un concepto de diseño de una sola dirección.

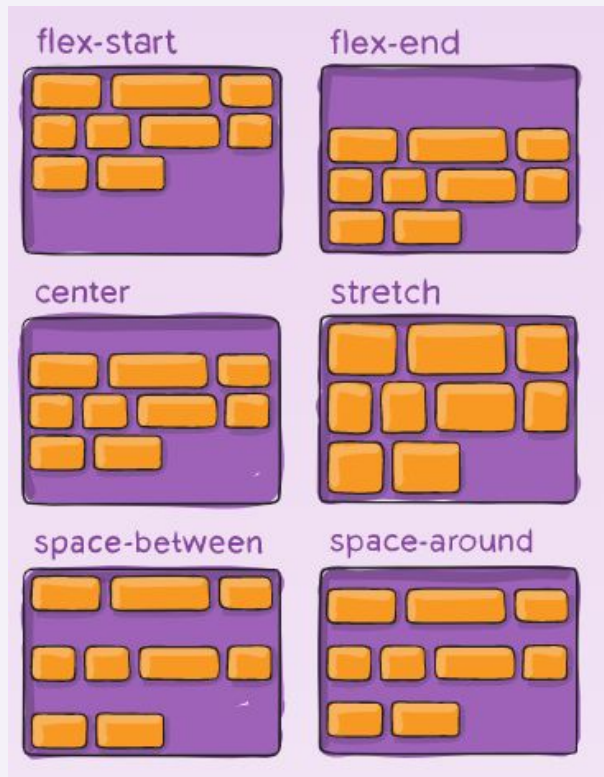

JUSTIFICAR CONTENIDO

ALINEACIÓN

ALINEACIÓN DE CONTENIDO

ACTIVIDAD

¡A JUGAR!

FLEXBOX FROGGY

< Level 1 of 24 >

Welcome to Flexbox Froggy, a game where you help Froggy and friends by writing CSS code! Guide this frog to the lilypad on the right by using the `justify-content` property, which aligns items horizontally and accepts the following values:

- `flex-start`: Items align to the left side of the container.
- `flex-end`: Items align to the right side of the container.
- `center`: Items align at the center of the container.
- `space-between`: Items display with equal spacing between them.
- `space-around`: Items display with equal spacing around them.

For example, `justify-content: flex-end;` will move the frog to the right.

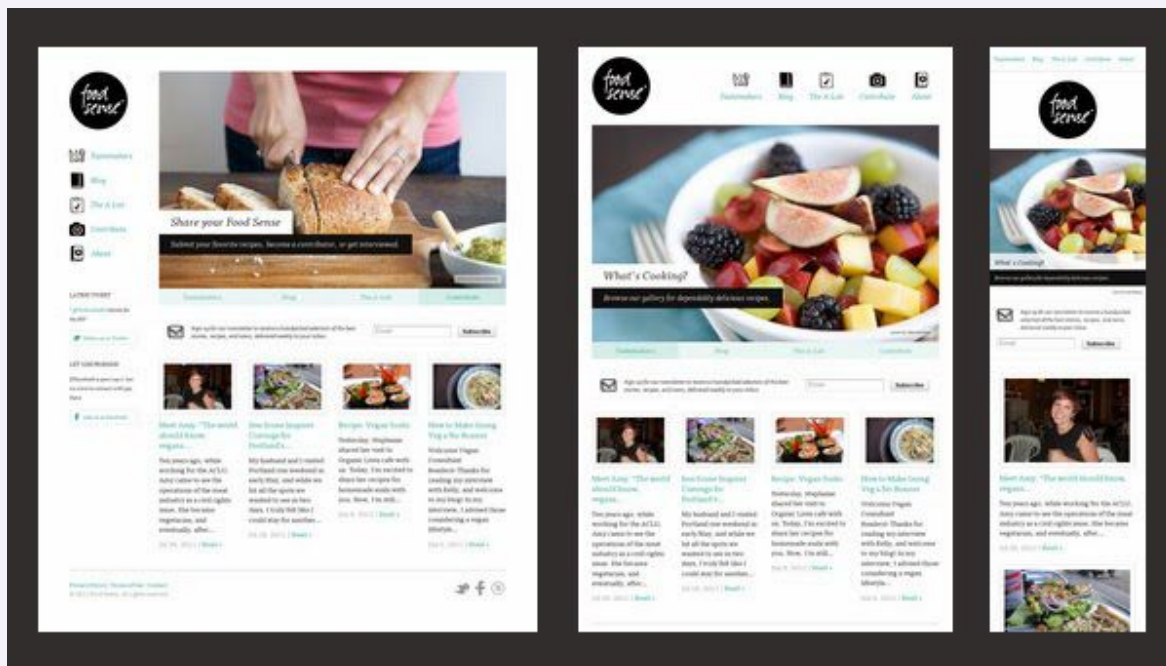

```
1 #pond {  
2   display: flex;  
3     
4 }
```
